

CLOUD PBX WITH YEALINK AND CISCO MERAKEI

GCOMM uses Yealink hardware devices with our premium Cloud PBX offering. Yealink produce leading voice communications tools ideal for a professional communications environment. Cisco Meraki Switching ensures a seamless Cloud PBX deployment and a clutter-free work environment.

Choose from GCOMM supported devices for a completely managed Cloud Phone System.

YEALINK T4S SERIES

Plug and play, no setup required.
Simply unbox your new handsets and watch your Cloud PBX come to life.

Choose from the Yealink T4S series for your Cloud PBX deployment. The ultimate phone system for professionals and businesses of any size. The Yealink T4S series is a premium hardware series, and the upgraded IP phone of Yealink's former T4G series.

MODEL	BENEFITS
	<p>Yealink T42S</p> <p>Simple, affordable handset Ideal for: Standard users Display: 2.7" graphical LCD</p>
	<p>Yealink T46S</p> <p>Functional, medium-use handset Ideal for: Everyday professionals needing easy access to dynamic features Display: 4.3" colour LCD</p>
	<p>Yealink T48S</p> <p>Advanced, heavy-use handset Ideal for: Executives, reception and professionals needing simple and accessible management of contacts and features Display: 7" colour touch screen</p>

YEALINK T4S HIGHLIGHTS

YEALINK OPTIMA HD VOICE

HD Voice guarantees a clear audio experience for participants on both sides of the phone call.

WIDE-BAND CODECS: OPUS, G.722

Improved audio quality in both high-bandwidth and poor-bandwidth environments.

GIGABIT ETHERNET TECHNOLOGY

Rapid call handling

ELEGANT CLASSIC DESIGN

The elegant, industrial design of the handsets look and feel at home in any business environment.

POWER OVER ETHERNET (POE) ENABLED

Minimise clutter, cables and maintenance by utilising your POE network.

3-WAY CONFERENCING

Easily add a third party to a conference call to speed up business and decision making processes.

LCD COLOUR DISPLAY*

The beautiful display makes the user experience enjoyable and seamless, with advanced features easily accessible.

*Feature not included with Yealink T42S model.

ADDITIONAL YEALINK DEVICES AND ACCESSORIES

Optimise your communications environment with specialised devices and accessories.

If you have a dynamic workforce then a traditional handset might not suit the unique needs of every person within your organisation. Some users might need advanced display functionality, increased conferencing accessibility, or users working in a retail store might need cordless communications.

MODEL	BENEFITS
	<p>Yealink EXP40 LCD Expansion Module</p> <p>This productivity enhancing device for busy professionals extends the display of your T46S or T48S handset to this fully functional graphic LCD interface.</p>
	<p>Yealink W60P Cordless Handset</p> <p>Enjoy all the benefits of a premium Yealink SIP handset, with mobile capability. Designed to enhance communication productivity for employees on-the-move. Upgraded hardware design delivers powerful features, reliability, flexibility and scalability.</p>
	<p>Yealink CP920 Conference Phone</p> <p>This conferencing device is ideal for small-mid sized meeting rooms, with 360° voice pickup, Yealink noise proof technology, and hybrid UC meeting functionality.</p>

T23G SMALL BUSINESS HANDSET

Some businesses may not require a high level of advanced functionality, but are looking for a cloud phone system for the simplicity, which will also save on costs. If your users don't need access to advanced features, but still need a reliable handset, then the T23G is a cost-effective solution which doesn't sacrifice on performance.

MODEL	BENEFITS
	<p>Yealink T23G</p> <p>Basic, minimum-cost handset Ideal for: Standard users requiring only basic functionality Display: 2.8" graphical LCD</p>

Features which are included in the T4S Series handsets which are not supported by the T23G include: LCD display, touch screen, USB port, WiFi, Bluetooth, customisation features, and compatibility with accessories such as EXP40 LCD expansion module.

CISCO MERAKI CLOUD MANAGED SWITCHES

Self-configuring, self updating, cloud managed.

Take advantage of the power of POE for a seamless, clutter-free work environment.

Top-of-the-line Cisco Meraki switching ensures the most elegant cloud deployment, from your LAN network to the Cloud PBX. Eliminate the need for multiple power supplies and network cables. Using Cisco Meraki and Yealink, daisy-chain your handset to your work station for even less cable management.

Model	Benefits
	Cisco Meraki MS120-24 Switch Ideal for small-to-medium sized organisations 24-port Gigabit ethernet with POE
	Cisco Meraki MS120-48 Switch Ideal for medium sized organisations 48-port Gigabit ethernet with POE
